GUIDED DATABASE QUERY

Explore biosynthetic evidence

Select a biological question, enter a metabolite and optionally a species. The answer is generated directly from MPSMBD records.

1 Ask a structured question

Choose the closest question type.

Question

Which species have a complete predicted route?

Metabolite

berberine

Example: Berberine | Berberine in Coptis chinensis

Query MPSMBD

2 Database answer

Results remain linked to pathway and enzyme evidence.

Berberine has the following species with all predicted upstream steps required to rea

Pathway 1: **Berberine Biosynthesis Pathway**

MPSM000128
Role: End product, Final target, Pathway target

Complete predicted species (4)

Cinnamomum kanehirae
11 complete predicted route(s) to this metabolite

Coptis chinensis
11 complete predicted route(s) to this metabolite

Macleaya cordata
11 complete predicted route(s) to this metabolite

Papaver somniferum
11 complete predicted route(s) to this metabolite
